Tracts with Low Self-Response Rates

Find the following information in the table below:

1. The 2020 Census tract number, the county in which this tract is located, and the nearest city/place to that Census tract
2. The self-response rate of this tract to date
3. The "hard-to-survey" populations contributing to a potentially lower response rate for that tract as identified by the Census Bureau
4. The 2020 Census outreach and education coalition partners located nearest to that tract and any other helpful demographic geographic characteristics that may facilitate targeted outreach

Response Rates for Native Communities

This table highlights the response rates in tribal areas across NE Washington. Where data are available, low response factors listed below display relevant statistics for those living in the listed Tribe's lands (including reservation and off-reservation trust land).

| Tribe | County | Response Rate | Predicted Low Response Factors (per Census Bureau) |
|---|-----------------|---|---|
| Confederated Tribes Of The Colville Reservation | Ferry/Okanogan | 14.5%* (No mail-return in 2010) | 60.2% American Indian/Alaska Native 32.8% white 37.2% renters 26.4% below poverty level \$39,500 median household income 19.6% vacant 34.6% no internet |
| Kalispel Indian Reservation | Pend Oreille | 14%* Difference from 2010 Mail-In: -20.5% | 90.5% American Indian/Alaska Native 13.3% below poverty level \$39,400 median household income 13.8% renters 52.5% no internet |
| Spokane Indian Reservation | Spokane/Stevens | 10.1%* (No mail-return in 2010) | 83.6% American Indian/Alaska Native 33.0% below poverty level \$32,500 median household income 33.4% renters 43.2% no internet |

*Note: Households within this area are a part of the Census [Update Leave](#) operation. Due to COVID-19, households in Update Leave areas have not received packets from the Census Bureau with information on how to complete the Census which has likely resulted in a lower response rate at this time.

Tracts with Relatively High Percentages of Seasonally Vacant Units *and* Low Response Rates

This table highlights tracts with low self-response rates to date that contain a relatively high percentage (>30%) of seasonally vacant units (e.g., summer homes, second residences, cabins) where many respondents likely have a "usual home elsewhere," targeted outreach may not be effective, and Census Bureau staff will classify many of the seasonally vacant homes during nonresponse follow-up.

| Map # | Tract # County | Response Rate |
