Tracts with Low Self-Response Rates

Find the following information in the table below:

1. The 2020 Census tract number, the county in which this tract is located, and the nearest city/place to that Census tract (*Note: Some tracts have been displayed with an enlarged point to be viewable at the regional scale*)
2. The self-response rate of this tract to date
3. The "hard-to-survey" populations contributing to a potentially lower response rate for that tract as identified by the Census Bureau
4. The 2020 Census outreach and education coalition partners located nearest to that tract and any other helpful demographic geographic characteristics that may facilitate targeted outreach

Response Rates for Native Communities

This table highlights the response rates in tribal areas across Central/SE Washington. Where data are available, low response factors listed below display relevant statistics for those living in the listed Tribe's lands (including reservation and off-reservation trust land).

Tribe	County	Response Rate	Predicted Low Response Factors (per Census Bureau)
Yakama Indian Reservation	Klickitat/Yakima	40.1% Difference from 2010 Mail-In: -18%	25.7% American Indian/Alaska Native 58% Latino 39.5% renters \$45,000 median household income 26.2% below poverty level 27.9% no internet

Additional

The following tracts exhibit low response rates but also contain schools, military bases and other facilities whose residents will be enumerated via the Group Quarters or other Census operations, so targeted outreach within these tracts may not be as effective as in other tracts with low response rates.

Tract	County	Nearest City/Place
1	Whitman	Pullman (Washington State University Campus)
